

fmPilot | FLEXIBLE, CUSTOMIZABLE, INDUSTRY-LEADING CMMS SOFTWARE

fmPilot is the most comprehensive and customizable facility management software platform available today. Our technology streamlines facility management activities by centralizing work orders (WOs), invoicing and service provider management. fmPilot optimizes maintenance processes, eliminates wasteful spending, and provides you with the data you need to effectively plan and manage your operations.

fmPILOT ADVANCED WO MANAGEMENT

- + Central repository for WOs and asset tracking; twelve years of data and growing exponentially
- + Breakdown of WO life cycle and operational footprint
- + KPI comparisons to similar clients in similar locations for WO cost analysis by trade
- + Analysis of similar WO history from other clients proactively predicts potential breakdowns or repair needs
- + Branded interface with visibility into key operating equipment / assets, and capital replacement planning

fmPILOT OPTIMIZES AND CONNECTS

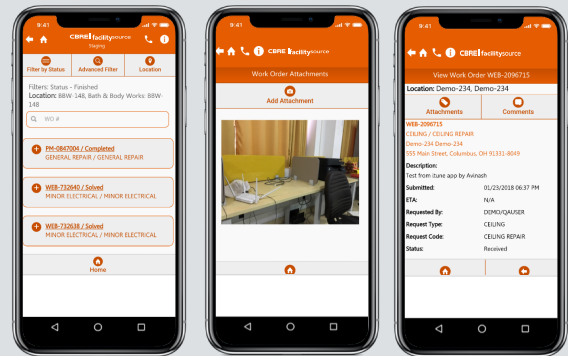

BUSINESS INTELLIGENCE DRIVES SAVINGS

- + Executive dashboard for day-to-day mgmt; real-time updates
- + Reliable insights and business intelligence to drive action and predictive management
- + Cost savings through more accurate budget planning and expense reconciliation
- + Quicker, easier identification of locations with high spend
- + Tracking of key performance indicators

STAYING UP. AND RUNNING. ON THE GO
